DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 and 57-67 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shelton in view of Lorscheidt. Shelton discloses a molded stick deodorant composition (which comprises a "pharmaceutically acceptable vehicle") comprised of first and second compositions arranged in the form of concentric cylinders (column 11, lines 5-10) wherein the different compositions can be of different colors (column 7, line 2 and column 9, last line) and the composition appears transparent or translucent when applied (column 11, lines 24-32). It is noted that statements of intended use, i.e., "for an animal in need thereof", do not lend any patentable structure to the claims. Although the Shelton reference does not disclose the container used to dispense the composition, attention is directed to the Lorscheidt reference, which discloses a container for automatically dispensing deodorant when the cap is removed wherein the composition is in sliding contact with the interior rigid wall 10 of the container and the interior and exterior contours of the container are different, (the exterior includes threads while the interior does not). Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to

Art Unit: 3751

dispense the Shelton composition from such a container in order to enable the composition to be automatically dispensed when the cap is removed.

Allowable Subject Matter

Claims 13 and 68 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
